Fermanagh BT92 0FA**
Process Information	The finished chicken product is produced using whole muscle chicken fillets. There is an incision made in the chicken breast and the 20g garlic butter infill inserted. Product is then placed on the line and coated in a predust, batter and breadcrumb coating, and flash fried to seal the coating. The product is frozen to -18°C or below through a gyro (Chilling Unit). Finished product is packaged into 1.20Kg food grade bags, labelled, metal detected (CCP), weigh checked and packed into cardboard boxes, stored frozen for dispatch. Product is dispatched frozen (<-18°C)
Critical Control Points in the Process	Metal Detection: Successful rejection of all designated test pieces
Meat – Country of Origin	European/ Non-European
Microbiological Standards	

	TARGET	REPORT
TVC Count cfu/g	<100,000	>1,000,000
